Prince & Izant Company Completes Acquisition of Clad Metal Specialties

Cleveland, OH — May 30, 2025 – Prince & Izant Company, a leading manufacturer of highly engineered brazing alloys and precious metals for critical and demanding applications, is proud to announce the acquisition of Clad Metal Specialties, a full-service metal processing firm that produces high-quality metal cladding composite materials for various end market applications including Aerospace, Defense, Automotive, Semiconductor, Electronics, and others.

Founded in 1985, Clad Metal Specialties brings forty years of expertise in metal cladding technology, offering a broad portfolio of technically complex capabilities (e.g., Full Clads, Inlays, and Toplays) and a strong reputation for quality and technical excellence.

This strategic acquisition marks another significant milestone in Prince & Izant's continued growth. It reinforces the commitment to delivering innovative, high-performance materials to customers across the Medical, Aerospace, Electronics, and Industrial markets. By combining strengths and complementary capabilities, P&I is positioned to better serve its global customer base with greater ability, speed, scale, and precision.

"The addition of Clad Metal Specialties to the Prince & Izant family is a natural fit," said Matt Brandenburg, Prince & Izant's CEO. "Their specialized expertise and dedication to engineered materials align perfectly with our vision of being the preferred partner for mission-critical applications. Together, we are positioned to offer even more value to our customers through innovation and deep technical support."

The Clad Metal Specialties facility in Bay Shore, NY, will continue operations with the same commitment to quality and customer service that has defined its legacy. "We are excited to welcome their talented team to Prince & Izant and look forward to a seamless integration process," said Brandenburg. As we move forward, our customers and partners can expect the same high level of service and support, with the added benefits of enhanced capabilities and broader expertise."

Headquartered in Cleveland, OH, P&I provides highly engineered brazing alloys in various forms (ring, wire, rod, strip, band, washer, disc, paste, amongst others), as well as kits and flux, delivering specified and precise products for critical and demanding applications in the aerospace & defense, space, medical, electronics, HVACR, and other industrial markets. P&I is an engineering- and customer-centric business, differentiated through its material science expertise, consultative and technical sales approach, short lead times, tight tolerances, and reputation for quality.
